Vote **RODRIGUES**

**Even more good reasons to vote for
RODRIGUES for Regional Councillor**

Community Associations – need to be established in every community. As your new councillor, I will regularly attend your meetings to directly hear your concerns and answer your questions. Whether your issues are about speeding cars, sidewalks, sprawl, sewage, or whatever else concerns you.

Your Voice needs to be heard in-person by your Regional Councillor.

“Developer Free” Candidate – This means I won’t accept any campaign donations from the Land Development industry. It is a clear case, of at least the appearance, of a conflict of interest. With the explosion in development growth being planned, it is best that politicians are completely disengaged from those who stand to profit.

Publicize Council’s Voting – Councillors may say one thing, but it’s important to make public and easily accessible, what the voting record actually is for each councillor for every motion. Councillors must be accountable for their votes at Pickering Council and at Durham Region Council.

Economic Development – has to encompass a diverse mix of businesses for sustainable growth. Protection for our agricultural lands can co-exist with increases in high-salary, prestige employment. A greater emphasis has to be implemented for more employment.

Urban Development – has to include well-planned and properly designed neighbourhoods. More affordable local recreational activities for children and families, would reduce health care costs, beneficially engage residents in communities and improve the quality of life. You shouldn’t have to drive to get to every store or restaurant.

Seniors’ Concerns – include safe, walkable neighbourhoods, and good public transit. Without an increasing source of income, property taxes are a heavy burden.
